

Advanced Psychometric Analysis

Morrisby Profile is our flagship service and is trusted by over 1,000 schools around the world. It provides the most detailed insight into abilities, personality and preferences to help guide students to make the best possible decisions.

Identifying strengths

Objective psychometric assessments identify a student's strengths across academic, technical and practical areas. These aptitudes are combined with measures of career and study interests, motivations, preferences and personality to form a comprehensive personal profile. The profile provides the student with personal insights, raising self awareness.

Raising aspirations

The What-If tool encourages students to see which careers become available to them if they reach the next qualification level, or decide to complete an apprenticeship. When a student tries one of these scenarios, the career suggestions will change, and highlight new careers and subjects that become available.

Achieving goals

For those young people who know their direction, Morrisby can help them investigate the best routes to achieve their goals and also explore similar careers and courses, including many they may never have considered. When combined with the built in interview templates, this becomes a highly valued guidance system.

Finding the right path

Morrisby has information about apprenticeships, college and university courses, and potential careers including salary expectations and different routes to employment. This support does not end when students leave school as Morrisby Profile users have a login for life to repeat profiling as they change over time.

Management system

Data and dashboards

Careers leaders and teachers are well supported with a management system that is flexible and powerful. With multiple dashboards to interrogate data and a student database that makes it easy to see progress by vulnerable groups, classes and cohorts to name a few. Key data can also be downloaded for further interrogation.

Interview system

To aid the careers feedback and interview process, Morrisby has an Interview template system. This feature ensures the student fills in a short survey before their interview, and then provides a feedback outline to aid the interviewer.

Morrisby Pay

One funding option is Morrisby Pay. Parents are sent a URL, which is unique to your school. All they need to do is register their child and pay with a debit or credit card.
